

What are Google Apps for Education?

The term Google has become part of the daily vocabulary for most, the company name even being used as a verb form to indicate what we do when we need to know something. However, Google is much more than a powerful search tool. Google Apps for Education provide a suite of tools that allow for powerful collaboration, online file storage and access, and increased communication and content sharing, among other benefits.

All Prior Lake - Savage Area Schools staff and k-12 students have their own PLSAS Google account in the domain @plsas.org. Members of our learning community can access their district-provided Google accounts from any internet enabled device. To access accounts, visit www.google.com to sign in.

This allows staff and students to use:

- Email (students will only be able to receive email from within the school district - addresses that end in @plsas.org or @priorlake-savage.k12.mn.us)
- Google Drive (30 GB of storage and the ability to create documents, spreadsheets, presentations)
- Many more tools for increased application of learning based on the educational decisions of the teacher.

Student login information:

Username: Student Username@plsas.org

Password: Same as password for network login on a district computer

Staff login information:

Username: Same as network log in (first initial and full last name)@plsas.org
(jdoe@isd192.org)

Password: Same as password for network log in
