

Window Drawing

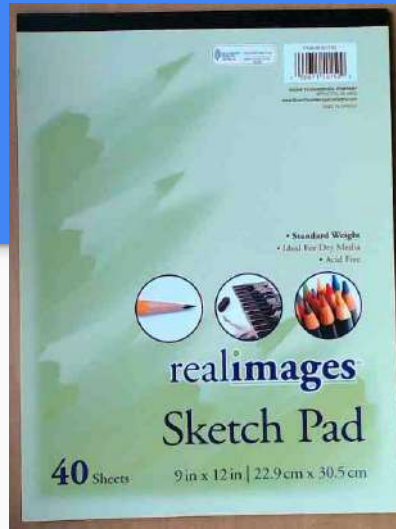

Draw what you see, outside your window.

Use this Guide, or follow the video:
https://youtu.be/-AMP_4_AgVY

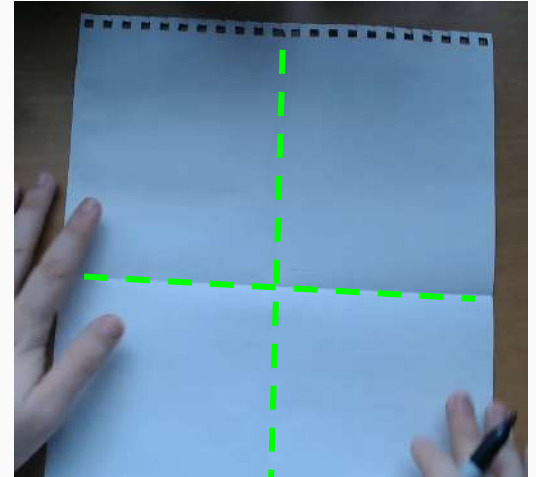

Materials

- Paper
- A drawing utensil
- Color supplies
- A window

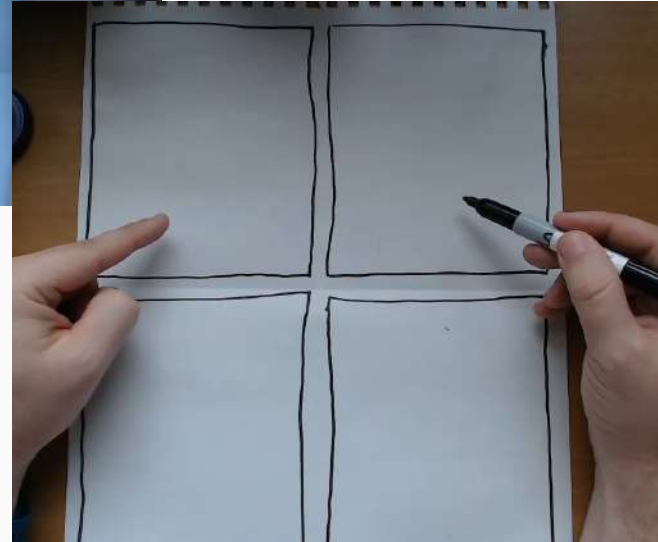

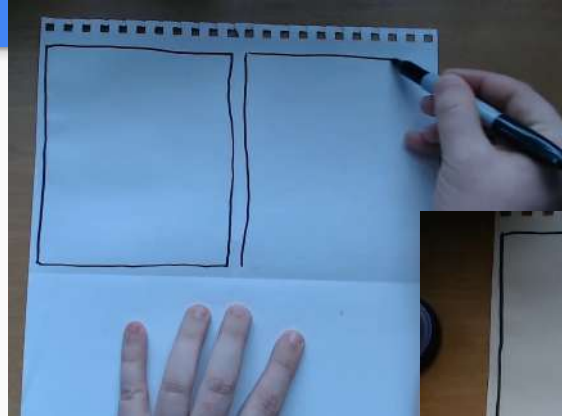

Step 1 - Divide your paper into quarters

Fold in half, make a crease, then unfold. Fold again the other way. Don't forget to match up your corners.

Step 2 - Make the window panes.

Now that the paper is divided into quarters, draw a rectangle in each quarter as big as you can. Leave enough room inside the rectangle to draw. Leave a little room between the rectangles for the window's frame.

Step 3 - Draw the sky boxes

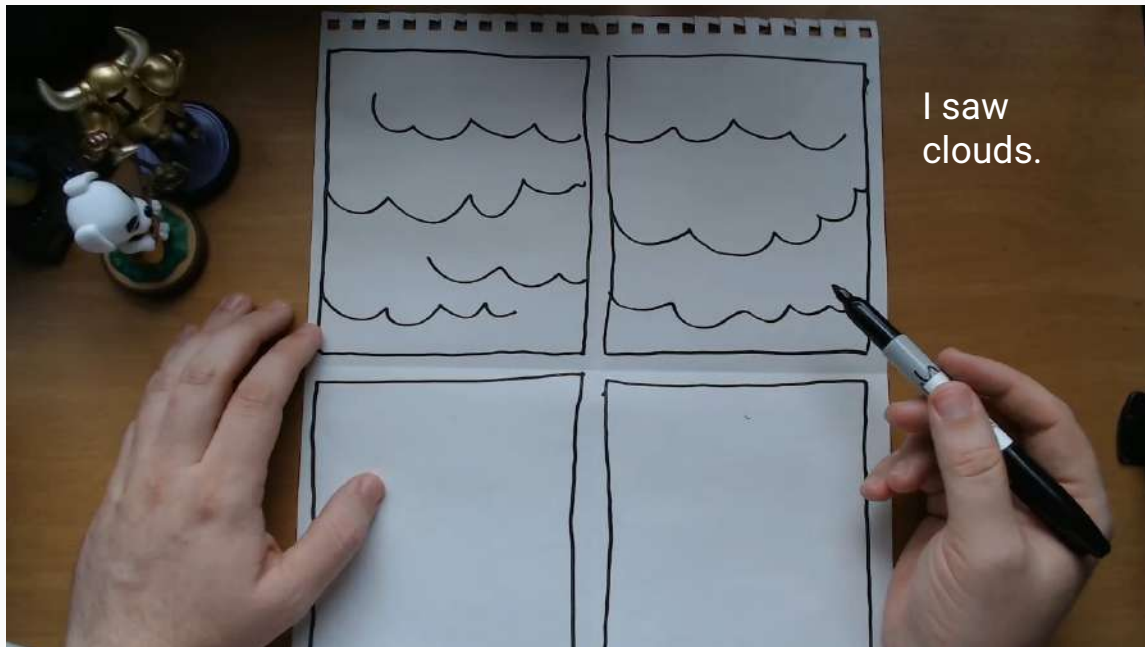

The top 2 squares will be for your sky. Draw what you see.

Is the sky cloudy?

Are there birds?

Can you see the sun?

Is there something else?

I saw
clouds.

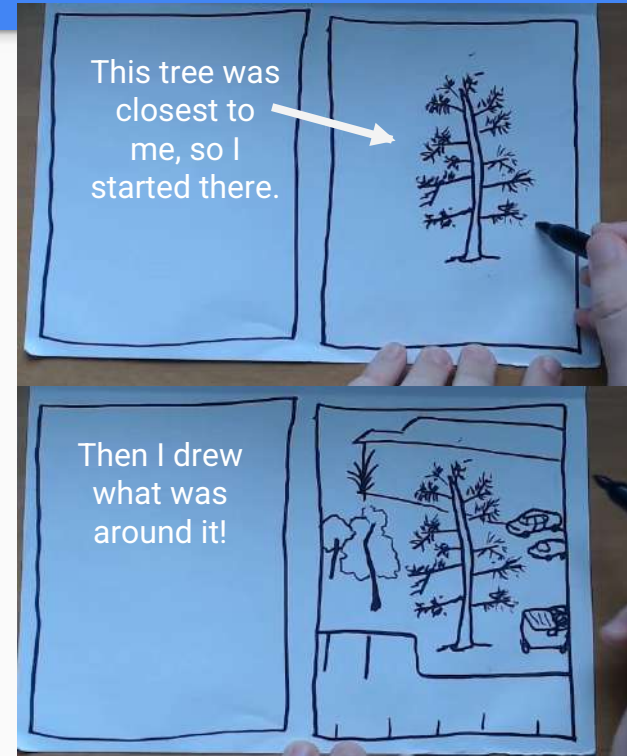

Step 4 - Draw the ground - Closest first!

What is on the ground in front of your window?

Start with what is closest, then draw what you see around it.

Things near you are **BIG** and near the **BOTTOM** of your paper.

Things far away from you are **small** and near the **MIDDLE** of your paper.

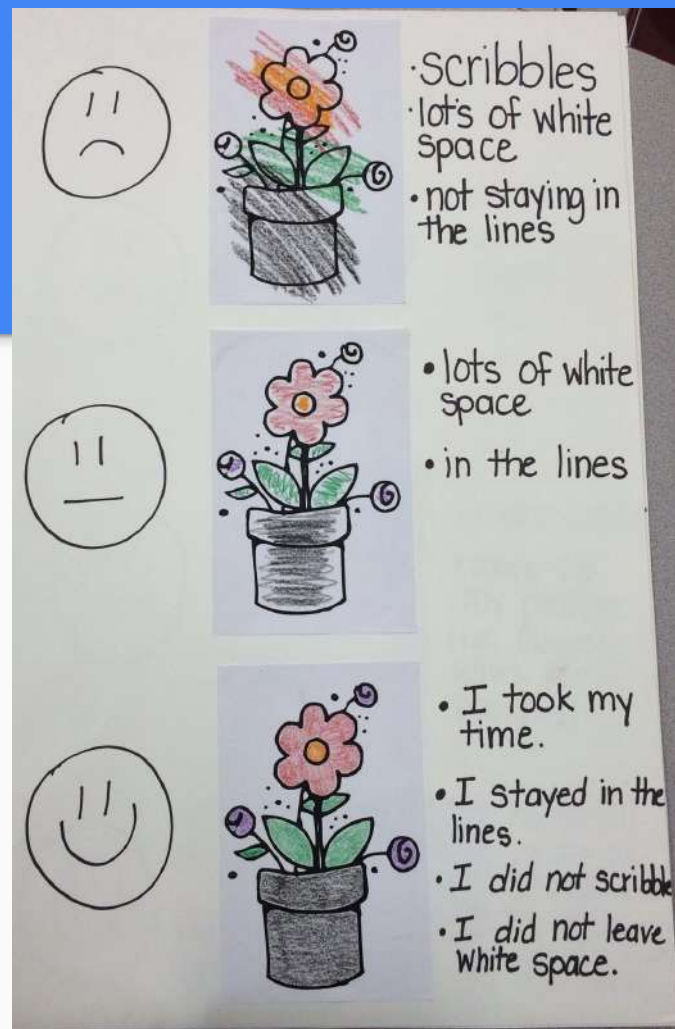

Step 5 - Add details

Remember, only
draw what you
choose to see.

It is your drawing!

Step 6 - Color!

Share it!

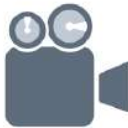

- Hang it up on the wall
- Take a photo with your device and share on your favorite social media
- Share it with a loved one.
