

**Instructional/Achievement Evaluation Results:**  
**Woodcock-Johnson IV Tests of Achievement**

On \_\_\_\_ (date) \_\_\_\_\_ the Woodcock-Johnson IV Tests of Achievement was administered by \_\_\_\_ (teacher name) \_\_\_\_\_ to assess \_\_\_\_\_ (student name) \_\_\_\_\_ current level of functioning in specific academic areas. He/She obtained the following results:

| Subtests and Composite      | Standard Score | Percentile | Classification |
|-----------------------------|----------------|------------|----------------|
| <b>Basic Reading Skills</b> |                |            |                |
| Letter-Word Identification  |                |            |                |
| Word Attack                 |                |            |                |

Basic Reading Skills cluster is a combination of the Letter Word Identification subtest and the Word Attack subtest. It is a measure of skills in the ability to identify sight vocabulary and to apply phonics to printed words and nonsense words. Student's composite score in Basic Reading Skills is in the \_\_\_\_ range at the \_\_\_\_ percentile.

| Subtests and Composite       | Standard Score | Percentile | Classification |
|------------------------------|----------------|------------|----------------|
| <b>Reading Comprehension</b> |                |            |                |
| Passage Comprehension        |                |            |                |
| Reading Recall               |                |            |                |

The Reading Comprehension cluster is a combination of the Passage Comprehension and Reading Recall subtests and provides a measure the ability to comprehend connected text while reading and the ability to retell story details from memory immediately after reading. Student's composite score in Reading Comprehension is in the \_\_\_\_\_ range at the \_\_\_\_ percentile.

| Subtests and Composite   | Standard Score | Percentile | Classification |
|--------------------------|----------------|------------|----------------|
| <b>Reading Fluency</b>   |                |            |                |
| Oral Reading             |                |            |                |
| Sentence Reading Fluency |                |            |                |

The Reading Fluency assesses how quickly, accurately, and expressively a student reads both orally and silently. Student's composite score in Reading Fluency is in the \_\_\_\_\_ range at the \_\_\_\_ percentile.

| Subtests and Composite | Standard Score | Percentile | Classification |
|------------------------|----------------|------------|----------------|
|------------------------|----------------|------------|----------------|

|                                |  |  |  |
|--------------------------------|--|--|--|
| <b>Math Calculation Skills</b> |  |  |  |
| Calculation                    |  |  |  |
| Math Facts Fluency             |  |  |  |

The Math Calculation Skills measures as student's computational skills and automaticity with basic math facts. Student's composite score in Math Calculation Skills is in the \_\_\_\_\_ range at the \_\_\_\_ percentile.

|                             |                |            |                |
|-----------------------------|----------------|------------|----------------|
| Subtests and Composite      | Standard Score | Percentile | Classification |
| <b>Math Problem Solving</b> |                |            |                |
| Applied Problems            |                |            |                |
| Number Matrices             |                |            |                |

Math Problem Solving cluster is a combination of Applied Problems and Number Matrices. The subtests measure the ability to recognize number patterns, reason with numbers, and solve practical problems in mathematics. Student's composite score in Math Problem Solving is in the \_\_\_\_\_ range at the \_\_\_\_ percentile.

|                           |                |            |                |
|---------------------------|----------------|------------|----------------|
| Subtests and Composite    | Standard Score | Percentile | Classification |
| <b>Written Expression</b> |                |            |                |
| Writing Samples           |                |            |                |
| Sentence Writing Fluency  |                |            |                |

The Written Expression cluster provides a comprehensive measure of production of written text, including spelling ability, writing fluency, and quality of written expression. Student's composite score in Written Expression is in the \_\_\_\_\_ range at the \_\_\_\_ percentile.
