Ms. Kamrass; Science Fiction and Fantasy

Task: **You and Technology...in 30 years**

Thirty years ago—Yikes! It was 1990—I was 20. I never could have imagined the internet (and how it affected my first career as a journalist), or cell phones, or a car that can steer itself. For this assignment, I'm asking you to imagine the changes that are in store for us. Relate how they will fully affect us.

Please be detailed and fully explain.

- How old will you be in 2050?
- Describe what cell phones and personal computers will be like at this time.
- What vehicles will people have?
- What will homes look like? What new technology will be applied to its functions (light switches, appliances, etc.)?

[illegible]
